

WILDWARZ

WHAT IS WILDWARZ?

WildWarZ is a card shedding game. It is a new multiplayer card-skill game that has a sustainable ecosystem with a rising incentives scheme that will sustain on its own.

The community will be the decision-maker in the ecosystem, making the ecosystem decentralized to its core.

NFT COMPANIONS

A companion is an NFT character in the game which will allow you to access the game. Think of it as a key to a locked gate. WildWarZ companions are immutable NFTs stored on the Polygon blockchain.

Without a companion, you won't be able to enter and play the game. While owning a WildWarZ companion, one will be allotted with energy to play the game and complete daily tasks. Initially, there will be a genesis companion mint which will be followed by multiple other companion mints in the future.
